

# GAMES 'n stuff v2

06/11/2013

MIRRORS  
EDGE

DICE™ EA™

# ME

Lukas Van Daele

- Level Designer
  - Partying, tech-trance/metal, guitar, VFX, card games.
- 23 years old
- Mods 'n stuff
- 3y Digital Arts & Entertainment (Belgium)
- Internship @ DICE
- 2,5y as a professional
  - Battlefield 3
  - Mirror's Edge (2)

Started with building-like games: Rollercoaster Tycoon, Age of Empires 2 map editor  
2D game creation, 3D maps (Far Cry), mods.

# SHOW E3 TEASER TRAILER

Mirror's Edge (2)

## F.A.Q.

### Frequently asked questions

- When and why did you start working in this line of work?
- What did you do to get a job at DICE?
- What DICE game is your favorite
- What would you like to do if you didn't work as a level designer?
  
- How big was the design team for BF3?
  
- What's your view on your rivals?
- What do you feel is the most important thing to make the gamer feel entertained?
  
- What's the most importance difference between an AAA studio and an indie studio?
- Describe how you work with EA?
- Do you need major math skills to work at DICE?

#### **When and why did you start working in this line of work?**

- ...

#### **What did you do to get a job at DICE?**

- Portfolio, design test, interview

#### **What DICE game is your favorite**

- Mirror's Edge, BFBC2 (fondest memory even though BF3 is a better game).

#### **What would you like to do if you didn't work as a level designer?**

- Try getting back into art, VFX for movies.

#### **How big was the design team for BF3?**

- Team as a whole 200+, design team around 15-20?

#### **What's your view on your rivals?**

- They do a great job 😊 Rivalry is good.

#### **What do you feel is the most important thing to make the gamer feel entertained?**

- Players value different things so it's important to stick to your guns and decide on your goal publicly and go through with that in the best way possible.

#### **What's the most importance difference between an AAA studio and an indie studio?**

- Money, lol. Creative freedom in a way but then again, you would never be able to do something as GIANT without that funding! So it all depends on what YOU want to make.

#### **Describe how you work with EA?**

- They own us so they approve projects, besides that DICE is surprisingly independant!

#### **Do you need major math skills to work at DICE?**

- As a programmer, yes... And not only maths but also physics (collisions, etc...).
- For pretty much all jobs logic skills are necessary. Art is very technical, level design needs logic, etc...

# INDEX

- 1) GAMES & DEVELOPMENT
- 2) DICE
- 3) GAME DESIGN THEORY
- 3B) LEVEL DESIGN

# MARKET CHANGES

Games then & now

## Boxed

- CD's, manuals, maps, ...
- Expansions

## Digital

- DLC
- Pre-order bonuses
- Subscriptions
- Micro-transactions
- Full game

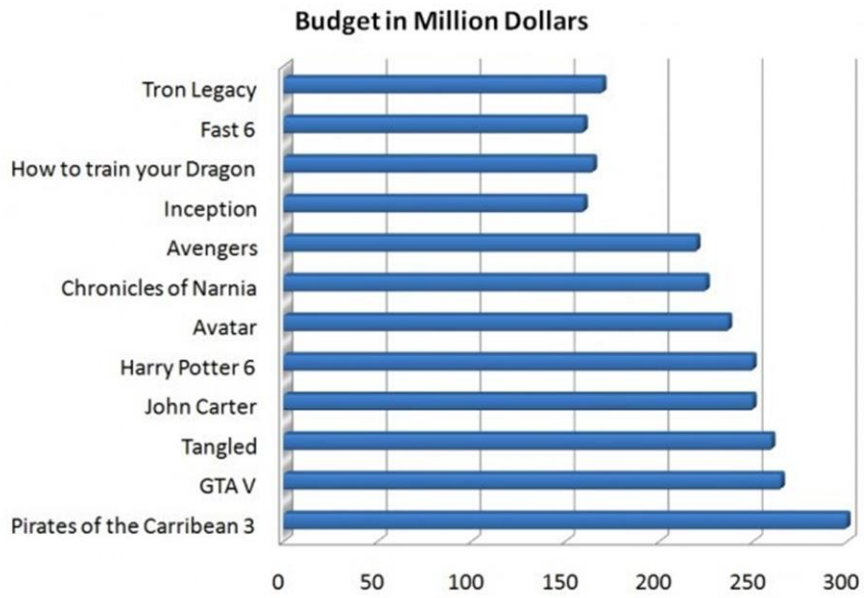

Used to have big boxes, some kind of ownership.  
Very thick manuals, multiple CD's, maps.  
(Explain EULA, you own a license. - Perhaps)  
Games are becoming a service rather than a package deal.  
Basically: The price model is changing!

# GTA V -VS- OTHER GAMES

# GTA V -VS- MOVIES

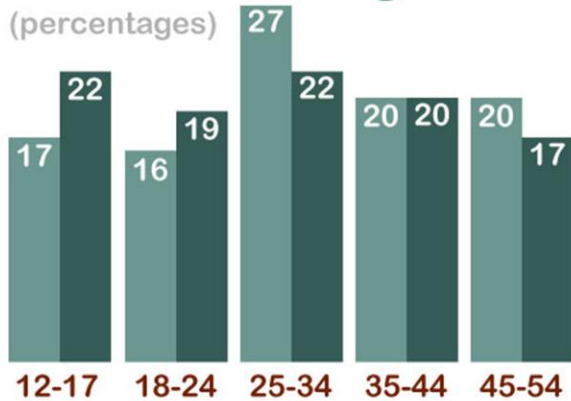

# DAYS TILL 1 BILLION \$ REVENUE

# WEEKLY PLAYTIME new gamers vs established gamers

(percentages)

new gamer: less than 2 years playing  
established gamer: more than 2 years playing

**18**  
**HOURS**

Average time spent  
PER WEEK by gamers  
playing video games

The graphic features a teal background with a white clock icon showing approximately 18 hours. The text '18 HOURS' is prominently displayed in large, bold letters, with '18' in dark red and 'HOURS' in orange. Below this, the text 'Average time spent PER WEEK by gamers playing video games' is written in white.

# AGE

## gamer age distribution

**2 out of 5** gamers are **female**

# TYPES OF COMPANIES

## First-Party developer

- Nintendo
- Naughty Dog
- ...

## Third-Party

- DICE (Publisher owned)
- Crytek (Self-published)
- ...

## Independent (Indie)

- Mojang
- Rovio Entertainment
- ...

How funding affects this:

Funded by your publisher... Or Kickstarter, rich daddy, lottery...

Valve and steam publishing. (Cutting the middle man)

## JOB ROLES

### Management team

- CEO
- Producer
- Managers/directors ...

### Development team

- Programmer
- Artist
- Designer
- Sound engineer

### Support

- Game tester
- Publishing
- Marketing

### Other departments

- Engine team (Frostbite)
- Outsourcing
- Motion Capture

Producers/directors outside game teams, overarching multiple stuff. And some that are part of the dev team.

Each discipline has multiple branches of specializations.

# GAME DEV CYCLE

(1 game process)

Concept phase

- What?

Pre-production

- How?

Production

- Making the game

Post-Production

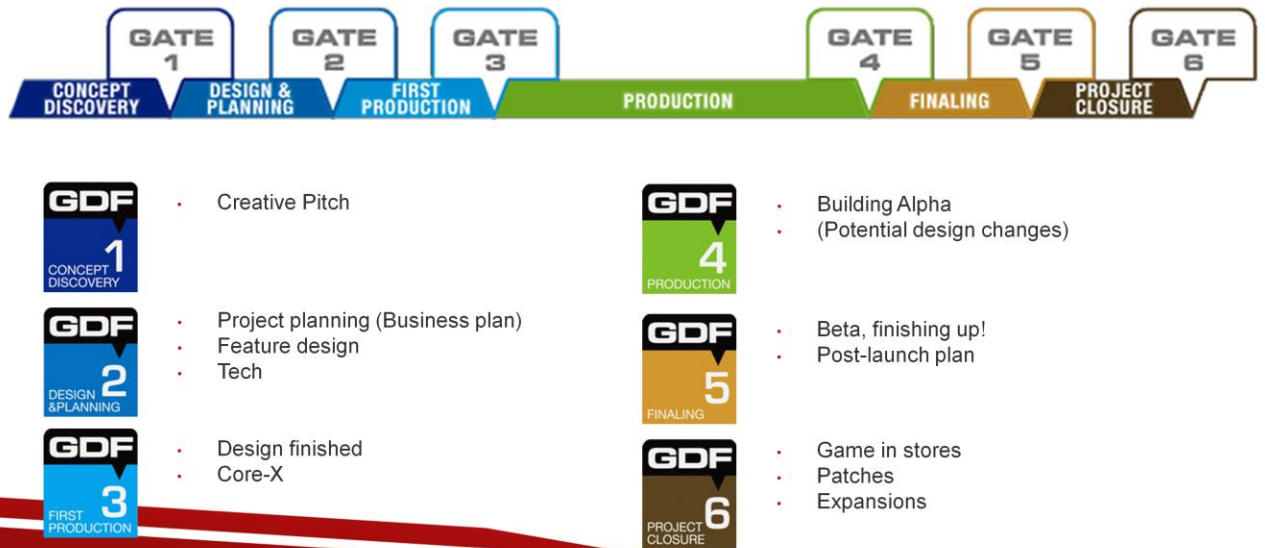

- DLC, patching, ...

Total = Usually 2-3 years

Go over this fast, more in depth information in the DICE section.

# EA DEV FRAMEWORK

## CONCEPT DISCOVERY:

- Ideas: - FPS, MMO
- Business: How to be profitable

## DESIGN & PLANNING:

- Core-team, more artists/designers, ...
- What tech will we need to build, CAN we make it?
- Design documentation

## FIRST PRODUCTION:

- Design docs are finished (can still change though!)
- Build Core – X, all important features present

## PRODUCTION:

- Full team

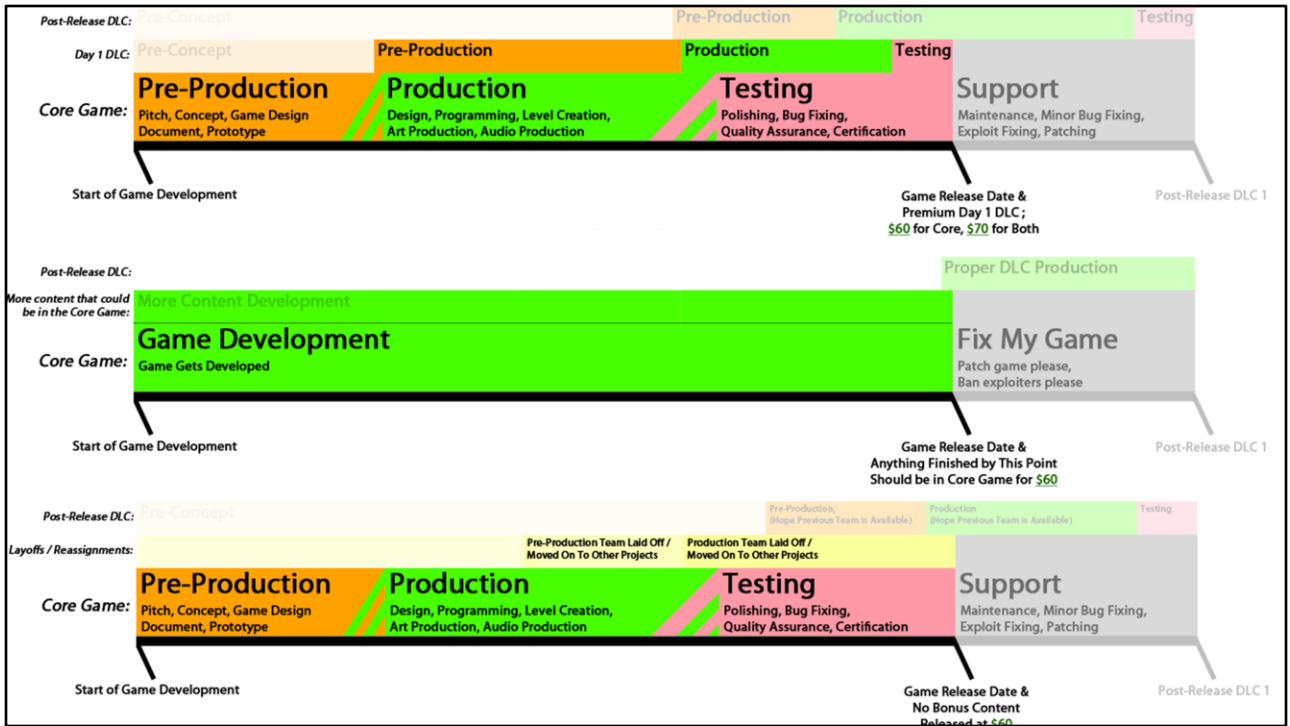

## FINALING:

- People moved off the project, some work on further DLC.

## PROJECT CLOSURE:

- DLC team keeps working, patches keep on getting released.
- The rest of the team on different project

DLC. Gamer entitlement.

DICE LA, different studios. Act almost like independent studio, need to pay for their stuff as well!

## 2) DICE

Founded in 1992

EA acquisition in 2006

300 employees

- 19% non Swedes (me!)
- 18 Nationalities
- 10% girls
- 22% of Sweden's game devs work at DICE

Battlefield series sold over 50 million copies

BF3 sold 25 million copies

1992: 4 guys in highschool

## DICE TIMELINE VIDEO

Battlefield  
Mirror's Edge  
Star Wars Battlefront

Rallisport Challenge  
Midtown Madness 3

BATTLEFIELD  
4

MIRROR'S  
EDGE

STAR WARS  
BATTLEFRONT

# DICE OFFICE

# WORKING AT DICE

## The good

- Social interaction
- Casual attire
- Flat hierarchy
- Pub Friday once a month

# WORKING AT DICE

## Perks

- Expo's
- Shooting range
- Trips

### 3) GAME DESIGN THEORY

- Design in general
- Design doc
- Player archetypes
- Flow
- Risk/Reward

# DESIGNING GAMES

(Any type of game, really)

Start from theme

- Design mechanics to reinforce theme

Start from mechanics

- Design theme around gameplay

Usually a bit of both.

Limitations in general = GOOD! = Out of the box thinking

# GAME DESIGN DOC

And/or pitch doc

## Mix of pitch/design information

- Created during concept discovery

Example:

### HIGH LEVEL CONCEPT

...vision needs that has never existed. +  
...olution, you WILL be entertained.

...and Enlighten™  
...essed for the price of \$20 on PC,  
...eased on EA's digital Distribution platform

...unrealistic modern warfare scenario,  
...distribution values compared to the quality

...distribution.  
...It's a new installment in the DICE  
...Battlefield...

...a chronic alcohol  
...The war was not for  
...DICE game in a  
...regions are put in

...The first chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The second chapter takes place in and around the  
...Colonel Hunt is. The player will have to reach it  
...way and reach the objective to find out where the  
...The final boss is of course his ex-wife that he let  
...hating it out for it.

...The third chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The fourth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The fifth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The sixth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The seventh chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The eighth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The ninth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The tenth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The eleventh chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The twelfth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The thirteenth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The fourteenth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The fifteenth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The sixteenth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The seventeenth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The eighteenth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The nineteenth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The twentieth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The twenty-first chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The twenty-second chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The twenty-third chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The twenty-fourth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

...The twenty-fifth chapter takes the player to the far north  
...Colonel Hunt is hiding after hearing from the mouth  
...of a fight to the death, but to fail like a real man, a  
...entire responsibility.

### KEY AREAS OF FOCUS

Focus

Lighter and Distraction with the unique feature.

### KEY GAMEPLAY MECHANICS

BIG events

...of the game ends with a "BIG event" which takes place in the final  
...the chapter. During these sections the player will go in the so called  
...the final boss in a dramatic and cinematic way.

### WHY BUY THIS GAME?

- The most brutal and realistic game that is and ever will be known to mankind.
- You like shooting stuff? Well, keep shooting baby.
- Easy to understand concept - Mindless action and great entertainment value.
- Light and humorous tone.
- Massive Duke Hudson look like a okay guy.

### BACKSTORY SYNOPSIS

STILLER was part of an elite military unit focused on quick-in and out missions. The unit was called "Operation X" and was active during the early-2000s. After a failed mission and being awarded on a severe session of South-East Asia, he spent 27 months while seeing his former unit succeed to the forces of nature, one by one.

After recovery he made his money as an (illegal) mercenary, joining the group that rescued him. It was only after 3 years that he moved back to the military. However, he did not receive professional therapy and came back as a killing machine. He looked fine on the outside but was a mental mess on the inside. Soon he started killing the military units. It all went downhill from there. After a while he got engaged to all his soldiers and while being betrayed by his former boss, Colonel Hunt. He became Stiller and didn't feel like climbing up the military career ladder to work for all he knew they were all soon. And that's when he snapped.

He was placed in a mental asylum under close supervision. He DID ok for some months, but he couldn't find peace and was the hell to handle. And this is when the game starts: by breaking out of the asylum.

# GAME DESIGN DOC

## DO's and DONT's

- Think when you introduce concepts/dependencies
  - Names of characters
- "Depth" at right time (Less is more)
  - Gameplay mechanics not focussed in 1 section
  - No overview
  - Way too long story intro <> Story dependent mechanics but story not introduced yet...
- Less is more
  - Short, focussed vision
- Find your "core" of the game
  - Add limitations, don't bloat with different features

# PLAYER ARCHETYPES

Different types of gamers

## Explorer

- Discovery, hidden stuff, easter eggs

## Achiever

- More points, achievements, collecting

## Socializer

- Player interaction

## Competitor (killer)

- Vs players, leaderboards, ratio's

## Story focussed

- Being a part of a cinematic experience

- Do the Bartle Test!

Players value different things.

# COGNITIVE FLOW

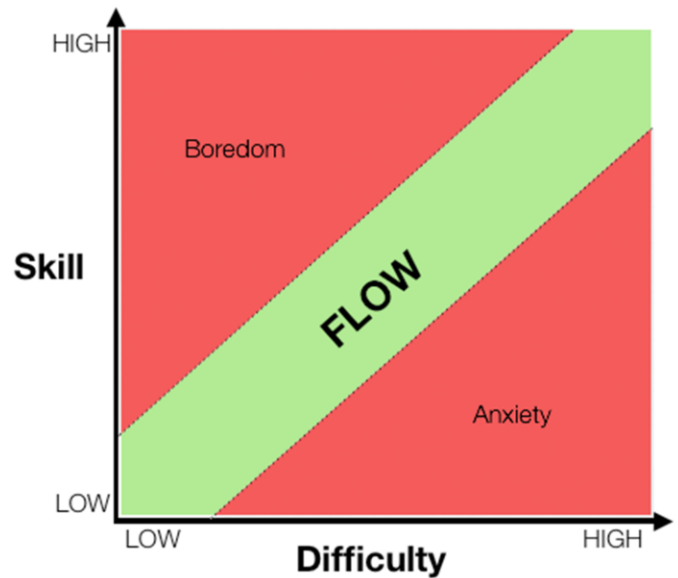

## Flow

- Extreme focus
- Sense of active control
- Merging of Action & Awareness
- Loss of self-awareness & time

- =Immersion

## Flow enhancers

- Clear goals
- Player actions fit capabilities
- Clear & Timely Feedback
- Eliminate distraction

“The experience of the task being the only necessary justification for continuing it.”

One must have a good balance between the *perceived* challenges of the task at hand and his or her own *perceived* skills. One must have confidence that he or she is capable to do the task at hand. =Your own skill versus the challenges in the game.

Flow killer: Taking away control (cutscene). Some personalities easier to get into the flow than others.

Clear goals: If not = Distraction

For instance Arkham City, player is bombarded with information = distraction = flow breaker.

# FLOW ENHANCERS

## Clear goals

- "Help! WTF am I doin'?!!"

## Player actions fit capabilities

- Fair difficulty

## Clear & Timely Feedback

- = Rewards

## Eliminate distraction

- Keep player focussed

**Performance**

## Clear goals:

People have limited information processing capabilities.

Introduce goals when the player is focused and the least distracted. Divided attention is bad!

Introduction of new mechanic during something else, new quest during conversation,

...

## Player actions fit capabilities:

Act of achieving goals is a powerful reward, if you keep things manageable you can keep the player engaged.

If player can't complete goals then they may experience stress-provoking drops in performance. Kills flow states.

If goals become increasingly difficult to accomplish then the commitment to accomplishing these goals diminishes. Player will likely stop playing.

## Feedback:

Feedback is accomplishment, empowers player to continue.

# RISK & REWARD

= challenge

## Common risks

- Waste of resources
- Player damage
- Impede progression
- Waste of time

Tedious bad, challenging good = excitement

## Rewards

- Resource gain
- HP
- Continuing to play
  - Solving puzzle (mental challenge)
- Shortcuts (time)

Risk/reward is a system established by the arcade generation that rewards the player for taking a risk that goes beyond what they are asked to do normally.

If the player does not care if they improve then the player cannot be challenged. Ergo we've removed both risk and challenge from the game and made it "unfun".

## RISK & REWARD

= challenge

Common problem in linear design

- Less risk
- Illusory rewards as milestones

Example:

Flaws of linear game design

- Vs crossword puzzle

Crossword puzzle game. Multiple crossword puzzles, increasing in difficulty each time.

Clear goal: Finish puzzle

Reward: Filling in a word gives clues about the next words

Risk: Filling in the wrong word potentially sets you back!

However, players can fill it without needing the other words. IF the player has the skill he can bypass chunks of the game.

In a linear game this is not possible. If you have a door game, you need to open door A to be able to pass through door B.

There is no way for the player, even if he has acquired the skills for door B to go there without first completing door A.

The conclusion is that levels have milestones to rewards the player rather than having rewards for player skill. = "Rollercoaster ride throughout the game"

## 3B) LEVEL DESIGN THEORY

### Singleplayer

- Guidance
  - Functional lighting
  - Composition
- Env story telling

### Multiplayer

- Balance
- Layouts

# LEVEL DESIGN PROCESS

Constant iteration

## Paper design

- Write doc
- Sketches, layouts

## Prototyping

- Test level specific mechanics

## Whiteboxing

- Level block out
- Scripting

## Playable

- Polish + tweaking

# LEVEL DESIGN PROCESS

Mirror's Edge

# LEVEL DESIGN PROCESS

BF3 - Coop (Drop 'em like liquid)

# LEVEL DESIGN PROCESS

BF3 MP - Strike at Karkand

# GUIDANCE

Helping players find their way

"How do you know what to do and where to go?" - mom

- Lighting
- Composition
- ...
  
- UI = Last resort

# GUIDANCE - LIGHTING

Functional Lighting

Magnar Jenssen

Environment is well-lit but nothing stands out.

# GUIDANCE - LIGHTING

## Exit Lighting

Magnar Jenssen

### Exit highlighting:

- End goal very obvious

# GUIDANCE - LIGHTING

## Path Highlighting

Magnar Jenssen

### **Path highlighting:**

- Holding hands, showing each step along the way

# GUIDANCE - LIGHTING

## Enemy Presentation

Magnar Jenssen

### Enemy presentation:

- Silhouette
- Light on cover
- Player can easily track enemy movement

# GUIDANCE - LIGHTING

## Hinting

Magnar Jenssen

### Hinting:

- Alternate passages, pickups, interests
- Don't let it interfere with main lighting!
- Don't make too obvious cos then it destroys sense of discovery!

## GUIDANCE - COMPOSITION

# GUIDANCE - COMPOSITION

## GUIDANCE - COMPOSITION

# GUIDANCE - COMPOSITION

## GUIDANCE - COMPOSITION

## GUIDANCE - COMPOSITION

# GUIDANCE - COMPOSITION

# GUIDANCE - COMPOSITION

## GUIDANCE - COMPOSITION

## GUIDANCE - COMPOSITION

## GUIDANCE - COMPOSITION

# GUIDANCE - COMPOSITION

# GUIDANCE - COMPOSITION

# GUIDANCE - COMPOSITION

# GUIDANCE - COMPOSITION

# ENVIRONMENTAL STORY TELLING

= challenge

Environment should reflect main storyline

- Anticipation
- Don't spoon feed: (Toddler research)

The less you tell your player the better! When people are told what to do/are fed everything in a spoon then they will stop exploring.

Relevant research: Explain example with toddlers that are given a toy and left to examine themselves or given a toy after explaining some functions.

# MULTIPLAYER DESIGN

## Base design

- Symmetrical/A-symmetrical terrain/layout?
- Landmarks
- Depth (secret areas)

## Balance

- Same distances to bases!
- Limiting "line of sight"
- Choke-points
- Cover
- Spawn points

## Contrast

- Verticality
- Open vs enclosed spaces
- Risk/reward zones

## POPULAR FPS LAYOUTS

UT 2004

- DM\_Rustatorium

Circles, circle 8. You will always go \*somewhere\*, you won't get lost in a dead end. You will end up in a choke-point.

## POPULAR FPS LAYOUTS

CoD 4

▪ Crash

Notice same pattern, little more complex.

# POPULAR FPS LAYOUTS

## Counter strike

- De\_Dust

Even more complex. Same ideas though but less of a constant flow. Counter strike maps are usually played on either side of a choke point with less running around.

## POPULAR FPS LAYOUTS

### Battlefield 3

- Caspian Border

Kind of the same concept but on a much grander scale.

BF also is more sandboxy, shitload of weapons/vehicles... Teamplay.

So you can barely compare these maps to the standard FPS maps that have dominated for decades.

And in general comparing games that are so vastly different to one another is kind of stupid.

# SO WHAT DEFINES A GOOD DESIGNER?

= necessary skills

## Design skills

- Problem Solving
  - KISS = Keep It Super Simple
  - Execution > ideas
  - Flexibility
  - Game knowledge
- All this stuff together = Design intuition.

## Communication skills

- Team player
- Player Empathy
- Process feedback

## Learn more? Check out:

- [Gamasutra.com](http://Gamasutra.com)
- Ultimate level design guide

## Mad Skillz

KISS: Don't add features, control schemes that are unnecessary. Less is more!

Communication is not about what you say, it's about what gets heard. You have to get your team to understand the vision of the game.

Design instincts, you know tips and tricks. You know what is fun. Explained further down in single player design.

# GETTING INTO THE GAMES INDUSTRY

## Spare time

- Modding
    - Portal 2 creator, Skyrim, minecraft textures, ...
  - Finish it, move on! Embrace the suck.
  - Very time consuming, need dedication!
  - Join community, ask for feedback and learn
    - Polycount, Mapcore, ...
  - Create good base before doing the fun stuff
  - Ideas are cheap, execution is everything.
- 
- College/University
- 
- "You're not an artist because you talk about creating art.
  - You're an artist cos you create art." - Chet Faliszek - Valve Software => So CREATE something! 😊

Modding: Start small, manageable scale. Get involved in the community.  
It's important to finish stuff, make something better with what you've learned.

Create base before doing the fun stuff: Making fancy websites, logo's, inventing job titles. It's easy to get side-tracked. Just DON'T.  
Make portfolio to show off your qualities.

QA not a good way to move up imo. You get stuck in your position.

QUESTIONS?
